- Pop filter
- Foam cover
- Shock mount
- Adjustable arm
- Tripod stand
- User guide
- Gaming sticker

**System requirements**

- PC or laptop with USB port
- Windows 10, 8, 7

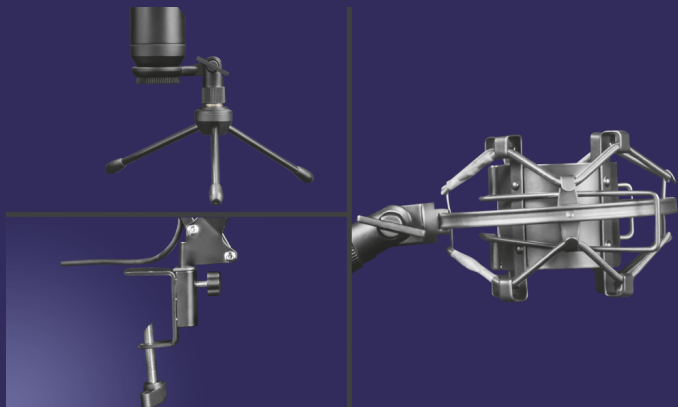

## Erita Plus Streaming Microphone

Whether you are streaming on YouTube, Twitch, Facebook or vlogging, podcasting, recording voice-overs or acoustic music, you want it to sound professional. This professional USB studio microphone with adjustable arm and high precision cardioid recording pattern is perfect for all your sounds. Let's hear your voice!

## Cardioid recording

The cardioid recording pattern picks up most sounds from the front of the microphone, while the distracting surrounding noises won't be hearable. In this way, the sound of your recording is focused, for that full-bodied and clear audio reproduction you are looking for.

## Shockingly stable

Easily and firmly attach your microphone with the adjustable desk mounting clamp: make sure your microphone is always in the perfect position for stable recording. The shock mount prevents vibration travelling up the microphone stand. Every small, distracting shock will be absorbed allowing your listeners to fully focus on your voice. For even more portable stability, you can use the included tripod stand.

## Popping sounds

Do you spend a lot of time editing your recordings to minimize the plosives (like P's and B's) or hissing noises? With the included large, double-screen pop filter, you will have improved speech quality. This makes sure your recordings sound professional, without the need for excessive editing. With the GXT 252+, you will be able to stream your perfect gameplay with excellent sounds.

## Plug in and sing!

The Emita Plus Microphone has a digital USB connection. Simply plug in the 2.00m USB cable and it will instantly work on any PC and laptop.
